When international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

- 1 A " - " following a place name indicates that the place is coextensive with a MCD. A " - - " indicates that the place is also a false MCD; the false MCD name is not shown.
- 2 This map shows tribal census tract boundaries and numbers within the subject entity; nontribal census tract boundaries are shown outside of the subject entity, but without numbers. A tribal census tract is a type of census tract defined within a federally recognized American Indian reservation or off-reservation trust land for the purpose of providing data based on an American Indian high-density population. A nontribal census tract is a census or off-reservation trust lands cross state or county boundaries; the same tribal census tract number may be assigned on both sides of the boundary, and, if so, the constituent single-county census tracts are numbered differently.
- 3 A " - " following a block number indicates that the block number is repeated elsewhere in the block.
